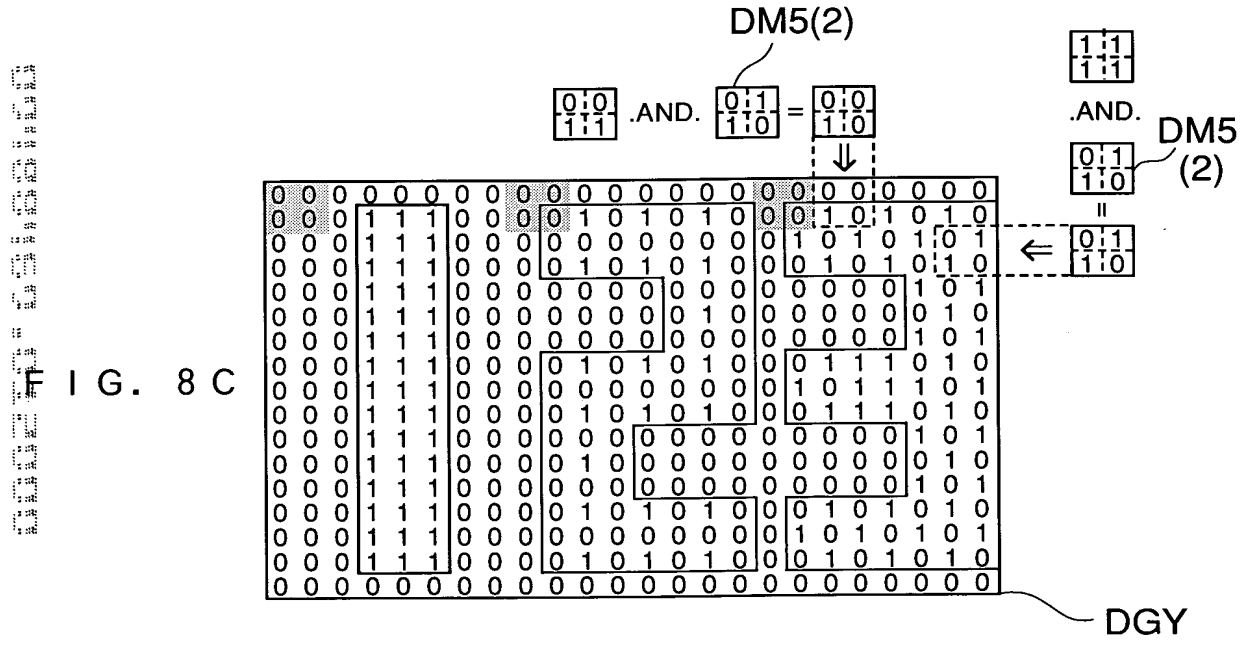

Figure 1 shows a 20x20 grid of bits (0s and 1s) representing a sparse matrix. The matrix is labeled 'A' on the left. A line points from the label 'DGC(DGK)' to the bottom-left corner of the grid. The grid shows a pattern of 1s and 0s, with some 1s highlighted by a shaded box in the top-left corner.

The diagram shows a 2D grid of cells, each containing a binary value (0 or 1). The grid is 20 columns wide and 20 rows high. A thick black line on the left side, labeled 'B', represents a boundary. Several rectangular regions are highlighted with black borders, indicating specific features or obstacles within the grid. These regions are defined by cells containing the value 1, while all other cells contain the value 0. The regions are located at approximately: (row, col) coordinates (1, 3) to (8, 3), (1, 5) to (8, 5), (1, 7) to (8, 7), (1, 9) to (8, 9), (1, 11) to (8, 11), (1, 13) to (8, 13), (1, 15) to (8, 15), (1, 17) to (8, 17), (1, 19) to (8, 19), (9, 3) to (16, 3), (9, 5) to (16, 5), (9, 7) to (16, 7), (9, 9) to (16, 9), (9, 11) to (16, 11), (9, 13) to (16, 13), (9, 15) to (16, 15), (9, 17) to (16, 17), (9, 19) to (16, 19), (17, 3) to (24, 3), (17, 5) to (24, 5), (17, 7) to (24, 7), (17, 9) to (24, 9), (17, 11) to (24, 11), (17, 13) to (24, 13), (17, 15) to (24, 15), (17, 17) to (24, 17), (17, 19) to (24, 19).
